Astaxanthin and Spirulina-enriched sea buckthorn marrow-based liquid dietary supplement

## Ingredients:

Sea buckthorn marrow: Contains more than 190 biologically active ingredients and has a full range of omega fatty acids. It is a natural form of serotonin that counteracts the effects of stress. Revered as a sacred fruit by Tibetans for centuries, it is rich in flavonoids and phytonutrients, which play a prominent health-enhancing role.

Aloe vera extract: Accelerates and normalizes metabolism, regenerates intestinal villi, cleanses the absorbent surface.

Pineapple concentrate: Reduces the acidity of the blood, thus helping to maintain and restore the body's acid-base balance.

Quince concentrate: Strengthens the immune system and has a beneficial effect on anaemia as it contains many vitamins, pectin and tannin. Rich in vitamins A, B1, B2, B6, C, E and P, as well as minerals (iron, calcium, potassium, phosphorus, magnesium). The content of vitamin P (citric content) is also unique, which can prevent or help heal scurvy and regulate cholesterol levels.

Peach Concentrate: A natural source of magnesium, calcium, selenium and zinc.

Spirulina algae: chlorophyll and vitamin B12 are outstanding.

Algae from Haematococcus pluvialis: The active substance is Astaxanthin, the strongest antioxidant.
