

# Zeomineral *Quartossa*

Ca, Mg, D3, K2 based dietary supplement

## Known properties of the four active substances:

- Lithothamnion corallioides: (red algae) which is made up of pure organic calcium and is one of the most important minerals in the human body. Calcium and magnesium are needed to maintain normal bones and teeth, as well as healthy muscle function. Osteoporosis is a serious consequence of calcium deficiency. Continuous calcium supplementation is especially important during pregnancy, lactation, rapid growth, and menopause. Calcium is needed for blood clotting, for the heart to contract properly, and for insulin to be secreted.
- Magnesium: is involved in about 300 different biochemical processes in our body, its main function being to contribute to the proper functioning of the nervous system. Lack of it can cause muscle cramps, migraines, depression, and heart failure

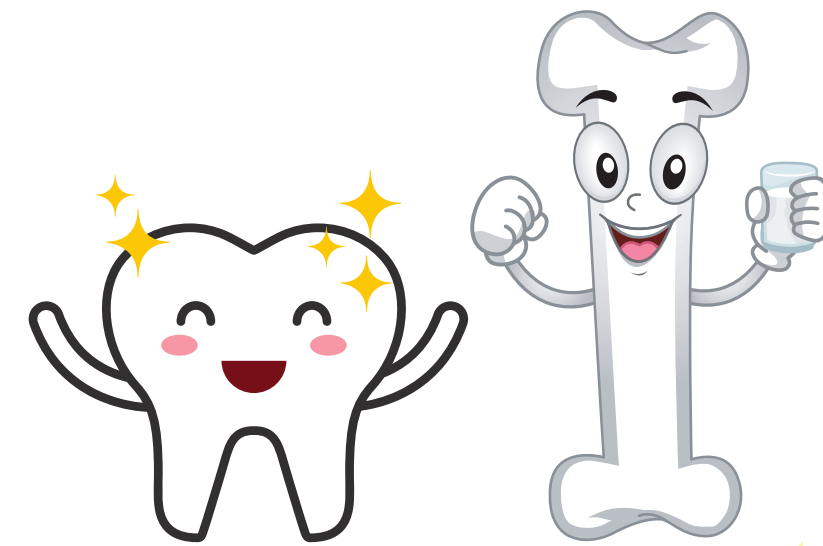

# Zeomineral *Quartossa*

Ca, Mg, D3, K2 based dietary supplement

## Known properties of the four active substances:

- Vitamin K2: is involved in the maintenance of normal bones and normal blood clotting. Vitamin K2 is produced by certain bacteria in the colon, and its production may decrease with age or with antibiotic treatment. The vitamin K2 in the product is of natural origin and contains more than 99% trans vitamin K2.
- Vitamin D3: contributes to the absorption / utilization of calcium and phosphorus, maintaining healthy bones, muscle function and teeth.

# Zeomineral *Quartossa*
