

# Zeomineral *Mild*

Natural Cosmetics

Skin-friendly liquid soap with clay minerals and amino acid

Grape-scented liquid soap with special biocoherent minerals gently cleanses and does not dehydrate the skin. Nourishes and revitalizes the skin due to its high lanolin content.

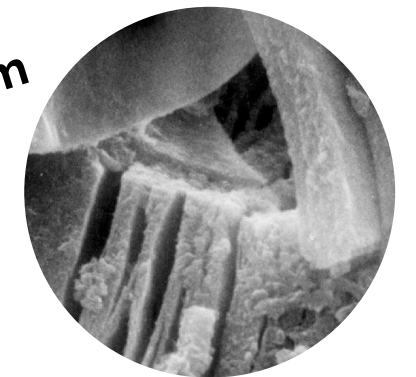

Clay mineral (smectite): Fe, Mg, Ca, Na, K The most important building cations of the skin together with Si.

The foaming agent used - sodium lauroyl glutamate - is a gentle surfactant derived from natural and recyclable sources. It is formed from the reaction of coconut oil and glutamic acid, cleanses well, foams slightly and is well tolerated by sensitive skin. There is no risk of harm to health.

Lanolin is a valuable, skin-related raw material, and its components have similar structures and properties to skin lipids. It has emollient properties.

SLS free! With natural colour!

Packaging: 500ml
