Natural cosmetics

Shower Gel family with Clay mineral and Amino Acid

Shower gel family with clay mineral and herbal essential oil

Origin: 12 million years ago, the Tokaj Mountains were an active volcanic area. In the area formed by volcanic ash and lava flows, as a result of post-volcanic activities, the silt of the limnic basins became clay mineralized in millions of years.

This special genetics endowed this special rock with special properties, the dermatological effects of which have been known for thousands of years.

Our zeomineral cosmetics do NOT contain SLS, SLES, or parabens (a carcinogenic preservative, according to scientific research).

Zeomineral *Gently*

Natural cosmetics

Shower Gel family with Clay mineral and Amino Acid

The Zeomineral Gently shower gel family consists of carefully selected ingredients, volcanic clay minerals, skin-friendly plant active ingredients and essential oils.

A gentle and natural cleanser for irritated, sensitive skin.

It regulates the mineral content of the skin, increases its resilience. The components of the minerals adsorb fats and oils particularly well, as well as excess sebum and semi-detached epithelial cells.

While bathing and showering, the shower gel cleanses and hydrates the dermatological cover as a thin layer of herbal mud.

The foaming agent used in our products is a gentle surfactant derived from natural and recyclable sources.

It is formed from the reaction of coconut oil and glutamic acid, cleanses well, foams slightly and is well tolerated by sensitive skin.

Our products contain only natural colours, these colours are not allergenic and are not absorbed through the skin.
