Dietary supplements with various algae

**Algeo:** A micro-algae-based product (dietary supplement) with fungi, papayas, rosehips, grape seeds, amla, and highly important astaxanthin. The daily dose (6 capsules / day) contains about 3 mg of astaxanthin. The product contains 180 capsules.

**Spaceman:** Astronaut food (food supplement). Microalgae-based product, Spirulina Platensis, Chlorella Vulgaris, Lithothamnium Calcareum, and astaxanthin.

The daily dose (about 6 capsules / day) contains about 6 mg of astaxanthin. The product contains 180 capsules.

**AlgaQ:** Microalgae-based product, Spirulina Platensis, Chlorella Vulgaris, Lithothamnium Calcareum, Curcuma Longa, and astaxanthin.

The daily dose contains 4 mg of astaxanthin. Powdered preparation.

## Dietary supplements with various algae

Cell Nourishment: Spirulina Platensis and Lithothamnium Calcareum algae feed cells with record amounts of more than 4,000 vital substances and their bioavailability is unique (highest among organic matter).

Cell Protection: Natural asthaxanthin is known as the most effective antioxidant, providing effective protection for cells. It is made from the extract of the algae, Haematococcus Pluvialis.

### Ingredients:

Chlorella Vulgaris: One of the oldest living things on earth. Spherical microalgae, approx. the size of a red blood cell. Because of its components it is an irreplaceably valuable nutrient.

Main components: with a chlorophyll content of 4%, it is the plant with the highest chlorophyll content. It contains a complete plant protein with all amino acids, including the eight essential amino acids. Vitamins (vitamin C, Niacin, Vitamins B, including B12 in active form, vitamin K, pantothenic acid, folic acid), minerals and trace elements (Mg, K, Mn, Fe, Zn, Ca, Se), contains antioxidants, polyphenols. High in fiber, rich in unsaturated fatty acids (cellulose).

Chorella is an expert of detoxification. It collects and removes heavy metals and chemicals not only from the intestinal tract, but also from the bloodstream, and adipose tissue. It stimulates the immune system, revitalizes cells, regulates intestinal function, helps maintain a healthy intestinal flora, relieves inflammation, ulcers, and allergies. Suitable for the treatment of skin diseases, it rejuvenates the body. According to some research, it slows down the growth of tumors.

Dietary supplements with various algae

Spirulina Platensis: Also considered one of the first green living things on earth. It is a tiny, spiral-shaped microalgae that uses photosynthesis to convert the Sun's energy into pure food. This small "green power plant" "produces" nutrients that are essential to maintaining our health. The Mayans and the Aztecs discovered its beneficial properties.

Spirulina is an expert in energy replenishment.

Its main ingredients: 60-70% of them are plant-based proteins that our body can utilize much better than animal protein. It contains more than 2,000 enzymes and all the essential amino acids. We can find the most important vitamins in it (e.g. the full range of B vitamins) and a lot of omega 3 and 6 fatty acids. It contains a lot of chlorophyll, which binds and transports oxygen in plant cells. It lowers cholesterol, blood pressure, blood sugar levels, deacidifies the body, detoxifies the kidneys and liver, and acts against hepatitis. Strengthens the immune system, helps with indigestion. It is one of the super-foods that contains the most vital substances. It is also a useful aid to the body and mind as it boosts brain performance and also improves concentration.

## Dietary supplements with various algae

**Lithothamnium Calcareum:** Its significance lies in its high calcium content, which it contains in a pure, natural, organic form, with an absorption rate of 96%. This alga is the richest source of magnesium, iron and several other trace elements. Calcium is essential for the regeneration of bones, teeth, nails, and hair. The current disease of mankind - osteoporosis - requires a great deal of prevention, especially in women during menopause. In adults, 20% of calcium is exchanged in bones, each year. Old cells die and new ones are formed, but only if magnesium, vitamin D, phosphorus, and other substances are present that help the body absorb calcium. 30% of its composition is made up from pure, natural, organic calcium. Red algae contains about 70 different types of naturally occurring components that help supplement the effects of the larger amounts of calcium found in it.

**Astaxanthin:** As an extract of the alga Haematococcus Pluvialis, protects the skin from UV radiation. It has an anti-inflammatory effect on the joints and eyes. Reduces the risk of cardiovascular disease.

### Antioxidant effect:

20 TIMES MORE POTENT THAN SYNTHETIC ASTAXANTHIN

50 TIMES MORE POTENT R THAN BETA-CAROTENE

60 TIMES MORE POTENT R THAN VITAMIN C

550 TIMES MORE POTENT THAN VITAMIN E

800 TIMES MORE POTENT THAN Q10

It outstandingly facilitates the protection of the cell membrane. Improves blood fat levels. It provides extremely effective protection against free radicals; is not "pro-oxidative" and is therefore uniquely void of side-effect. It is the most powerful antioxidant in the world.

Dietary supplements with various algae

Rosehip: Rosehip contains, among other things, vitamin C, essential oils, tannins, plant acids, pectin, flavonoids (Flavonoids are compounds found primarily in plants).

The name of this group of compounds is derived from the Latin word 'flavus' aka yellow, which indicates that many flavonoids and flavonoid-containing plants have an intense, mostly yellowish colour which usually accompanies mineral salts, magnesium, iron, iodine, vitamins A, B, K, and P. (Vitamin P is an adjunct to vitamin C and is commonly found in the same foods. Vitamin P helps in the absorption of vitamin C and protects it from oxidation). It has higher vitamin C content than peppers or lemons. It strengthens the immune system and, as it is high in vitamin C, it is also a great antioxidant, protecting cells and helping to break down fatty foods.

It stimulates the adrenal glands, lowers cholesterol, and replenishes the amount of iodine needed by the body.

Ganoderma lucidum: Used in traditional Chinese medicine as a medicinal mushroom, known as the "mushroom of immortality", the "ten-thousand-year old mushroom," the herb of spiritual strength.

- strengthens the immune system and the liver
- speeds up metabolic processes
- lowers cholesterol
- inhibits cell damage

Dietary supplements with various algae

Grape Seed Grind: Antioxidant. Grape seed extract is being used in more and more areas, especially in the treatment of free radical-related diseases such as heart attack and diabetes. It also effectively protects against bacterial infections. Grape seed grind supports the processing of edible fats, thereby improving the effectiveness of diets by enhancing the breakdown of glucose. Last but not least, through its antioxidant effect it improves the blood circulation of the scalp, thus nourishing and strengthening the hair follicles.

Shiitake mushroom: Shiitake mushroom is part of a healthy diet as it is extremely low in calories, free of fat but rich in nutrients. Shiitake mushrooms are an excellent source of vitamins A, B (vitamin B3 - niacin - a water-soluble vitamin that plays a significant role in the energy homeostasis of cells and the repair of the DNA chain), vitamins B12, C, and D. It is also full of minerals such as iron, potassium, calcium, magnesium, manganese, copper, zinc, and selenium. Shiitake mushrooms are an excellent source of dietary fibre and protein, with more amino acids (lysine, arginine, methionine, and phenylalanine) than those found in meat. In addition to being high in vitamins A and C, which are great antioxidants, shiitake mushrooms also contain most of the L ergothioneine (amino acid) substances that the body itself cannot produce, so we can only supply our bodies with this through nutrition.

Papaya: Content: enzymes, minerals, vitamins, and proteins. It contains all the enzymes that facilitate the digestion of proteins, carbohydrates and lipids. It contains papain (an enzyme similar to pepsin) (Pepsin is the protein that breaks down food in the stomach.) In doing so, it helps the pancreas a lot. Its effectiveness is not adversely affected by the current pH of the gut.

Dietary supplements with various algae

Amla: Amla powder is obtained from the fruit of the tree *Emblica Officinalis*. Amla, also known as Indian gooseberry, is an edible fruit that is outstandingly rich in vitamin C. Its intestinal and gastric cleansing effect is unique. All parts of the plant are used, in addition to its fruit, its seeds, leaves, roots, and bark are widely used for therapeutic purposes and for tea cures. Indian Ayurveda is registered in medicine as a general fortifying, invigorating, cleansing herb. Thanks to its extremely easy-to-absorb, extraordinary vitamin C content, which is 20 times higher than that of oranges, modern science also recognizes its beneficial effects on human health.

Curcuma Longa: Turmeric contains up to 5 percent curcumin, which is a polyphenol. Curcumin itself is the active ingredient in turmeric and is used in several places in food, as an additive, but nowadays it is becoming more well-known and sought after because of its beneficial effects on joint problems. Not only is it effective for joint pain, but it also stimulates anti-tumour action as well as insulin-producing cells in the pancreas. Its anti-inflammatory effect is of utmost importance.

capsules

Packaging: 180pcs

Daily dose: 3x2  
capsules

Packaging: 180pcs

Daily dose: 2x3 g  
powder (2 teaspoons)

Packaging: 180 g

## Warning!

If you have never taken algae products before, it is recommended that you start consuming the product only with a third or half of the daily dose for a period of 5-10 days.

As our body is not accustomed to this type of product, here in CENTRAL EUROPE, a training period may be needed to avoid discomfort. It depends on the individual. In our experience, a 5-10-day period is enough.
